THE PRESIDENT'S SCHEDULE

Friday - August 18, 1978

7:30
(90 min.) Breakfast with Vice President Walter F. Mondale,
Secretaries Cyrus Vance and Harold Brown,
Dr. Zbigniew Brzezinski and Mr. Hamilton Jordan.
The Cabinet Room.

9:00 Dr. Zbigniew Brzezinski - The Oval Office.

9:30 Mr. Frank Moore - The Oval Office.

9:43
(2 min.) Mr. Bob Samuelson, Congressional Candidate,
2nd District, South Dakota. (Mr. Frank Moore).
The Oval Office.

10:30 Mr. Jody Powell - The Oval Office.

11:00 Mr. Charles Schultze - The Oval Office.

11:45
(15 min.) Meeting with Humphrey-Hawkins Supporters.
(Mr. Stuart Eizenstat) - The Cabinet Room.

1:30
(30 min.) Interview with Labor Editors. (Mr. Jody
Powell) - The Cabinet Room.

2:30
(15 min.) Meeting with Representatives of the United
Negro College Fund. (Ms. Bunny Mitchell).
The Cabinet Room.

3:30 Depart South Lawn via Helicopter en route
Andrews AFB and Plains, Georgia.

WASHINGTON, D.C. 20503

17 AUG 1978

MEMORANDUM FOR THE PRESIDENT

FROM: JIM MCINTYRE *Jim*
FRANK MOORE *Frank*

SUBJECT: Department of Education Legislation

This memorandum brings you up to date on progress on the Department of Education and suggests action designed to help obtain passage of the legislation. Stu Eizenstat has concurred with this action.

Background

The Senate Government Affairs Committee reported the Department of Education bill Thursday, August 10. The bill (which now has 61 co-sponsors) is ready to go to the Senate floor. Senate floor action could come as early as next week; otherwise it will await the post-recess session in September.

In the House, the bill was reported favorably by the Government Operations Committee on August 15. Chairman Jack Brooks is awaiting a response from the Rules Committee to his request for a hearing. Through an intensive lobbying effort, we overcame an extended filibuster in the Committee. However, opponents of the bill will make a serious attempt to stop the bill in the Rules Committee. In order to keep alive the prospects for final passage this year, we suggest the following action.

Frank should be authorized to call, on your specific behalf, Representative John Brademas and seek his assistance in expediting the bill in the Rules Committee and on the House floor. If he agrees, tell him that the Administration will not oppose transfer of the vocational rehabilitation programs to the department.

*ok,
but I
don't support
this move
J*

There are good reasons to support the transfer of the vocational rehabilitation programs (VR), now located in HEW, to the proposed department. Both Houses (the Senate Committee unanimously; the House Committee on a 29-9 vote) have amended the legislation to include VR despite strong Administration lobbying and the transfer will pass regardless of our position.

I don't agree

- ° Congressmen Brademas and Quie feel strongly that the new Education department should include VR. They have not actively supported our bill to date. We believe they will work for the bill if we make clear to them that we will not oppose the transfer of VR programs. Because of Brademas' leadership position, and Quie's influence with Republicans on education-related issues, they can be very helpful in getting the bill through a hearing in the Rules Committee and consideration by the House. We need the help of Quie and Brademas on the House floor in order to assist passage this year. If Frank calls Brademas to tell him of your decision, he will have even more incentive to help.
- ° Handicapped groups representing more than 7 million members unanimously support the transfer. We can work with them, instead of on parallel tracks, if they know we will not lobby to delete the VR programs. Their active support will also help to counter allegations that the NEA is the only group that wants the new department.
- ° The transfer does have some merits. We considered recommending this transfer but narrowly decided against it. It would allow better coordination between VR and the closely related education for the handicapped, student assistance and vocational education programs. A recent GAO report noted the importance of coordination among these programs, particularly because it could help handicapped people in the transition from school to work.

?
We did just the opposite in Georgia

If you agree with this approach, we will clear it with Jack Brooks before talking to Brademas.

DECISION:

Agree to back off our opposition to transfer of VR to the proposed department (OMB, CL, DPS recommended) if Brademas will agree to support the Bill actively.

Disagree (HEW recommends).

THE SECRETARY OF HEALTH, EDUCATION, AND WELFARE
WASHINGTON, D. C. 20201

August 11, 1978

MEMORANDUM FOR THE PRESIDENT

FROM JOE CALIFANO *JCA*

Members of the Reorganization Project staff in OMB have informally asked that the Administration mute its consistently strong opposition to the transfer of the Vocational Rehabilitation programs from HEW to the new Department of Education. After intensive lobbying led by Congressman Brademas and interest groups representing the physically handicapped, the House Government Operations Committee followed its Senate counterpart in adding the Rehabilitation Services Administration this week, even as it rejected much more sensible and rational proposals regarding school lunch and nutrition activities and Indian Education programs that you had earlier recommended.

Although the prospect of reversing committee action on the floor of either the Senate or the House is concededly slim, I believe strongly that the Administration should hold to its clear, original position on this issue for the following reasons:

- The position of retaining vocational rehabilitation activities in HEW is clearly sound on the merits of policy and program relationships.

Vocational rehabilitation is closely related to income maintenance, health and social services which will continue to be organized and managed here in HEW. Vocational rehabilitation activities serve adults rather than children (indeed, the median age of beneficiaries rehabilitated in programs supported by the RSA is 32.3 years); more generally, the RSA fits badly and will prove to be a fifth wheel in a new Department whose center of interest and concern is Elementary and Secondary education.

The transfer of the RSA will also enormously complicate overdue reform of Federal policy and administration in the area of disability, where there has been an explosive increase in beneficiaries and costs over the last decade. To get control of costs in disability insurance and supplemental security income programs, we must dramatically increase the rate at which RSA programs actually rehabilitate disabled individuals for gainful employment and independent living, and that requires more, not less integration of related policies and programs -- both in Washington and in States and cities.

- The transfer of RSA to the Department of Education is almost certain to increase the hammer lock of interest groups over policy and programs in this area. It definitely will further increase the independence of this range of activities from Presidential management and feed the forces that have produced an increasingly expensive, and unmanageable legislative initiative during this session of Congress.
- Tactically, no one has specified any tangible political benefit in terms of the progress of the Department of Education proposal in committee or on the floor, or any other Administration legislative purpose that could be furthered by abandonment of our responsible and sound position on this issue.

J

CONGRESSIONAL TELEPHONE CALL

TO: Senator Hollings and Senator Hodges

DATE: This afternoon or tomorrow morning

RECOMMENDED BY: Frank Moore/Dan Tate *FM/BR*

PURPOSE: To thank them for their help on the tuition tax credit bill

BACKGROUND: As you know, earlier this week the Senate passed the Hollings amendment to the tuition tax credit bill. The Finance Committee had reported the Packwood-Moynihan bill which provided for elementary, secondary, and post-secondary tuition tax credits. The Hollings amendment, which stripped the elementary and secondary credits from the bill, was passed by a 56-41 vote. Senator Hollings and Senator Hodges worked long and hard to secure the passage of this amendment. They talked with every Senator at least once and asked for our assistance only in sealing commitments they had already gotten and in attempting to convert some Senators with whom they had had no success. They did a marvelous job in their lobbying and in carrying the debate which at times was bitter.

You should be aware that Senator Hollings has always supported the idea of college tuition tax credits so his efforts were not altogether altruistic. In a real sense he was an ally of convenience. Senator Hodges on the other hand has not made his views on the college credit known to us. I recommend that you call and thank them for their efforts and congratulate them on their success.

Additionally, you should know that Senator Hollings was one of the foremost advocates of the nuclear carrier and will be one of the leaders of the fight to override your veto of the military procurement authorization bill if that issue reaches the Senate.

MEMORANDUM FOR THE PRESIDENT

FROM: MARGARET (MIDGE) COSTANZA

mc

I have just read today's Washington Star report indicating that I identified two women as front-runners to succeed me and that an announcement would be made prior to your departure.

Neither report is accurate. I have no idea of the source of the information. I have never identified to anyone at any time specific individuals as front-runners for the position. In addition, I did not state that an announcement would be made before your departure. At a meeting of the National Advisory Committee for Women I said that I had encouraged you to make an announcement before leaving, but, in fact, there were absolutely no guarantees as to when the announcement might come.

August 17, 1978

MEMORANDUM FOR:

THE PRESIDENT

FROM:

JIM SCHLESINGER

SUBJECT:

Clinch River Breeder Reactor and Base Breeder Program

BACKGROUND

The House, as you will recall, rejected the Administration-backed Flowers amendment on the DOE authorization bill and instead has full-funded CRBR and not provided for its termination. The Flowers amendment would have terminated CRBR by Congressional action and authorized a conceptual design study for a larger breeder facility.

The Senate has not yet voted on the DOE authorization bill. The current provision on CRBR contained in the Senate bill reported out of the Senate Energy and Natural Resources Committee (the "Melcher Amendment"), would:

- (a) authorize the Secretary of Energy to terminate CRBR so long as component testing and completion of systems design on CRBR were accomplished; and
- (b) direct the Secretary to initiate "the design, construction, and operation of a new Breeder Reactor Project by contracting for a conceptual design effort." This design study would be completed by March 31, 1981, and the results of that study submitted to the Congress "in sufficient detail to support Congressional allocation of resources through annual authorization and appropriation of funds for the construction and operation of the new Breeder Project." The Congress would have to specifically approve the design before construction could begin.

The Melcher Amendment in effect provides the Administration with the unilateral right to terminate CRBR and authorizes a new breeder project through the design, construction and operation phases but mandates only the design study. Anything beyond the design phase would require Congressional approval of the design (before construction could begin) and subsequent annual authorization and appropriation of funds for construction and operation of the project.

MCCLURE-DOMENICI PROPOSAL

As I indicated briefly to you on the phone earlier, the proposal of Senators McClure and Domenici is based on their perception that the U.S. posture on the breeder program is a vital element in the perception of the world community -- and particularly the European community -- of our seriousness on energy matters.

Their proposal contains the following specific major elements:

(1) "suspension" rather than "termination" of CRBR and completion of a conceptual design study similar to that proposed by the Administration, with a report to Congress by March 31, 1981 and no commitment on the part of the President to recommend proceeding forward with construction at that point;

(2) an overall integrated plan for the LMFBR program, which includes the conceptual design work and which would provide the ability to begin construction of a more advanced breeder facility beginning in FY 1982 if a decision were made to do so in 1981; and

(3) a three-year commitment on the part of the Administration to an LMFBR base program at funding levels based on the Congressional levels for FY 1979, which levels are above the Administration's proposed FY 1979 level. Each of these issues is discussed more fully below.

(1) CRBR Termination -- The proposal would call for the "suspension" of CRBR -- rather than its "termination" -- for the period until March 31, 1981 (the date on which the conceptual design study would be forwarded to the Congress). During this period, final CRBR systems design, completion and testing of specified components, and completion of certain generic licensing issues would be pursued, but no other activity would be required. The activities to be undertaken are generally consistent with those which the Administration proposed in its compromise proposal in March. McClure believes that "suspension" would permit termination of CRBR in 1981 if a decision were made to construct a larger breeder demonstration facility; if the decision were not to construct such a facility, CRBR might in theory, though probably not in practice, continue forward.

The suspension concept is quite close in practice to the Administration's original proposal, in that no site-specific CRBR-related activities would take place during the period of the conceptual design

study. Certain legal problems regarding relationships with existing contractors would be created; however, in concept, the McClure proposal achieves most of what the Administration sought to achieve in its earlier compromise.

If the "suspension" concept causes difficulty, you might wish to propose to McClure the concept of "cessation" of CRBR activities as a mid-point between "suspension" and "termination."

The conceptual design study itself is very similar to the Administration's proposal; it does stress completion of as much work as possible "ensure that any final decision to proceed with construction could be implemented with minimum time delay." However, it specifically notes that no site selection would occur until after a final decision to proceed, and stresses that the design effort must include "active consideration of nonproliferation aspects of the design, reflecting the ongoing NASAP and INFCE activities." And the proposal specifically notes that the report submitted by the Administration in 1981 "shall not bind or commit either the President or the Congress to recommend construction."

(2) Integrated Program Plan -- The integrated LMFBR program plan called for by the proposal is similar to ongoing efforts within the DOE to refocus the LMFBR program away from Clinch River. The proposal does state that by the end of FY 1981, information should be made available "to proceed directly into the construction phase of an improved LMFBR demonstration plant in fiscal year 1982, if a final decision is made to do so." This, however, is not inconsistent with ongoing DOE efforts and involves no major additional commitment on the part of the Administration.

(3) LMFBR Base Program Commitment -- The proposal states that the President would agree not to veto the DOE authorization bill on LMFBR related grounds if passed by Congress with the LMFBR elements described in the proposal and would agree to implement the funding levels described in the proposal for FY 79-81.

The funding level proposed by the Senators, in comparison with those of the Administration, is set out on the following page.

It should be noted that I believe there is at least \$50 million in "give" in the figures which McClure and Domenici have offered; whether there is more than this, however, I cannot say.

	<u>ADMINISTRATION</u>	<u>McCLURE</u>
	(In Millions)	
FY 1979 Base Program	\$373	\$458
Conceptual Design Study	35	55
CRBR Termination	<u>20</u>	<u>13</u>

THE WHITE HOUSE
WASHINGTON

August 17, 1978

MEMORANDUM FOR THE PRESIDENT

FROM: STU EIZENSTAT *Stu*
KITTY SCHIRMER

SUBJECT: McCLURE REQUEST ON THE CLINCH RIVER
BREEDER REACTOR

Background

1. Original Administration position:

- Requested \$367 million for FY 1979 including
 - \$13 million for termination of CRBR
 - \$15 million for "technology integration"*
 - \$339 (the remainder) for the Liquid Metal Fast Breeder (LMFBR) base program.
 - Sought Congressional termination of the CRBR except completion of systems design and certain components which would be more economical to complete than cancel procurement contract.
- * Technology integration denotes work at a very modest level on an overall design in order to sensibly direct and integrate the numerous different LMFBR base program activities.

2. Flowers amendment:

- Authorizes \$428 million total for FY '79 including:
 - \$55 million for CRBR termination, and "conceptual design study" including completion of CRBR systems design, testing of certain CRBR components, and larger, more accelerated design work on a new breeder reactor.
 - \$373 for LMFBR base program
- Revokes Congressional authority to go beyond completion of systems design and testing of certain components on CRBR, i.e., terminates CRBR construction authority.

- Requires DOE to conduct a conceptual design study on an advanced breeder reactor facility, due March 31, 1981. The study shall:
 - explore uranium/plutonium and uranium/thorium fuel cycles and alternate reactor designs.
 - serve as the design basis for a large advanced fission facility,
 - address factors such as size, cost, generic environmental, technical and safety issues, and utility involvement.
 - include recommendations on plant design, and timing of such a facility (for additional design work, licensing, construction and operation) and estimates of plant costs.

3. The Senate Energy Committee Report

- Authorizes \$526 million for FY 1979, including:
 - \$13 million for CRBR termination costs
 - \$55 million for conceptual design effort
 - \$458 million for LMFBR base program
- Gives DOE authority to terminate construction aspects of CRBR, if DOE finds the project does not meet national requirements for demonstration of breeder technology.
- Requires initiation of a conceptual design study which must be completed by March 31, 1981, and include:
 - designs
 - cost analyses
 - preliminary engineering drawings,
 - utility studies
 - site selection studies (although no actual site is to be selected)
 - consultation with NRC on generic environmental and technical issues
 - proliferation resistance of the reactor and associated fuel cycles and technologies.
 - use of one of proliferation-resistant fuel cycles
 - consideration of other fast breeder concepts such as gas cooled fast reactor

- The final report must contain sufficient detail to support congressional action on construction and operation of new project through annual authorizations and appropriations.

4. The McClure proposal

- Authorizes a total of \$526 in FY 1979, with commitment not to oppose appropriations for the breeder demonstration project or the conceptual design study. Breakdown of expenditures is as in Energy committee proposal.
- Would bind the Administration to support both the focus and funding of the LMFBR base program in FY 1980 and '81 as well.
- Requests Presidential agreement not to veto the Department of Energy authorization bill, "if it is passed by the Congress with the elements described below for the LMFBR program". (Nb. we interpret this not to restrict your ability to veto the bill on grounds other than the LMFBR, but this is not expressed).
- Would "suspend" rather than terminate CRBR between now and March '81, although no construction activity would occur during that interval.
- DOE will conduct a study for an "improved, possibly larger LMFBR demonstration project" with final report in March 1981. The report shall:
 - include all supporting information necessary to make an informed decision on construction.
 - all elements of Energy Committee proposal, plus environmental impact analyses, maximum preliminary licensing effort to ensure that decision to construct could proceed without delay.
 - study funded at \$55 million per year for FYs '79, '80, and '81.

(The proposal stipulates that the report does not bind either the President or Congress to recommend construction of the larger project).

- LMFBR base program would be funded for FY '80 and '81 the FY 1979 level (\$458 million) plus inflation yielding FY '80 funding of \$500 million, and FY 1981 funding of \$550 million.

- DOE to prepare and submit within 4 months a detailed plan for accomplishing the above.

In summary, the McClure proposal would:

- Provide \$159 million above your original budget request, and \$98 million above the level agreed to in the Flower's amendment.
- Make a three year commitment to a level of funding, including an automatic inflation factor, which exceeds any highest option for the breeder which DOE has under consideration. It commits us in FY '80 and '81, even though needs and requirements may change.
- Does not permit actual termination of CRBR construction, thereby throwing our contractual and legal commitments under the program into disarray, and jeopardizing the tone, if not our actual commitment to defer commercialization of the breeder.

Preliminarily, we estimate that the McClure proposal expenditures over 3 years about \$400 million above that which we might recommend, even if we were to hold the LMFBR program constant at the level of the Flower's amendment.

Policy Considerations

- McClure's importance to the Natural Gas Bill

Depending on the strength of Domenici's commitment to stick with McClure in insisting on this proposal, and on whether Senator Johnston will sign the compromise, McClure may or may not be necessary to gaining a natural gas agreement. As we understand the current situation, only time and Joe Wagonner's decision on the compromise will tell whether Johnston will ultimately sign the Conference agreement. While McClure has been essential to the compromise process thus far, it may well be possible to reach agreement without him. Domenici's constituents will benefit from a gas agreement, but would get nothing from the CRBR/LMFBR proposal. If forced to choose, Domenici might well decide to stick with the bill which does him the most good at home.

- Impact on other natural gas conferees

Senators Bumpers and Hatfield have been strong supporters on the natural gas bill and on our CRBR position. Bumpers sponsored all Administration CRBR amendments in Committee and would be prepared to take the issue to a vote on the Senate floor if we felt it necessary. Hatfield has been supportive in the Senate Energy Committee as well as on the Appropriations Subcommittee, where he is the ranking minority member. Agreeing to the McClure proposal could jeopardize these two Senators' support for the natural gas agreement, although as far as we know, they have not been contacted to test their positions. Without their support on gas, a compromise is impossible.

- Impact on House liberals

The proposal would, on its face, violate a commitment which you made in a meeting with the liberal members of the House Science and Technology Committee not to move substantially beyond the Flower's amendment in seeking a compromise on the CRBR. While one might argue that the agreement with this group has been violated by the failure of the House to adopt the Flower's compromise, you would be subject to some criticism for not keeping your word. This could hurt us with some of the more moderate liberals who are supporting us on the natural gas bill (e.g., George Brown, Tim Wirth)

- Impact on Non-proliferation Policy

Agreeing to go substantially further toward breeder development than the Administration originally recommended could undercut our non-proliferation efforts, both bilaterally with the French, British, and Japanese, and multilaterally in the INFCE process. The funding commitment which the McClure amendment would entail, along with the failure to terminate the CRBR may be taken by our allies as a weakening of your resolve in the entire non-proliferation arena. While we could try to put the best possible light on the agreement, there appears to be enough residual skepticism of U.S. motives in the non-proliferation area to make that difficult.

o. Impact on Budget and other appropriations bills

Making a binding commitment to the FY 1980 and 1981 budgets would be a significant precedent which would be hard to back away from if similar commitments were sought by others. At a time when a number of bills are strong veto candidates on budgetary and inflationary grounds, agreeing to the McClure proposal could send a conflicting signal. The restraint on your ability to decide later whether to veto the DOE authorization bill is also troublesome, although could be managed if it is made clear you remain free to veto the bill on grounds other than the CRBR or LMFBR.

"FYI"

MEMORANDUM FOR THE PRESIDENT

SUBJECT: Environmental Quality and Water Resources
Management

As a Member of the Water Resources Council, I was pleased to receive your memorandum concerning Environmental Quality and Water Resources Management which was addressed in your Water Resources Policy Reform message of June 6. Your message fulfilled a long-standing need to reform policies for the planning and management of water resources.

Listed below are specific actions I will take to implement those parts of your memorandum applicable to the Department of Commerce.

- The Administrator of National Oceanic and Atmospheric Administration (NOAA) will be advised to work with the Assistant Secretary for Fish, Wildlife and Parks in Interior to assure that Secretary Andrus and I will be able to promulgate regulations, by March 1, 1979, defining the requirements and procedures which must be met to fully comply with the Fish and Wildlife Coordination Act.
- The Assistant Secretary for Administration will be asked to implement any new requirements for our annual budget submission to the Office of Management and Budget.

MEMORANDUM FOR: THE PRESIDENT
FROM: Cyrus Vance *CRV*
SUBJECT: Request for Decision on Conventional
Arms Transfer Cases

I. ISSUE

I am recommending that you approve 3 new Foreign Military Sales (FMS) cases for notification to Congress. All fall within existing policy guidelines. The Department of Defense and the Arms Control and Disarmament Agency concur with my recommendation.

II. BACKGROUND

Attached are descriptions of the cases with a place for you to record your decision.

The total value of these cases will be about \$305 million of which about \$275 will fall under the world-wide conventional arms ceiling for FY 79. Administrative procedures have been established to ensure compliance with the ceiling.

None of these sales would result in excessive economic burden for the recipients, serve to counter our human rights objectives or stimulate arms races or regional imbalances.

We have conducted the review called for under PD-13 of the Iranian I-Hawk depot which is an overhaul facility, and have concluded that it will not provide equipment in excess of Iran's needs.

These sales would contribute to U.S. foreign policy and national security interests, and I recommend their approval.

~~CONFIDENTIAL~~

DECLASSIFIED
Per: Rac Project
ESDN: NLC-126-14-6-1-9
BY: *KS* NARA DATE: 6/10/13

~~CONFIDENTIAL~~

PROPOSED NEW ARMS TRANSFERS

<u>TYPE CASE</u>	<u>COUNTRY</u>	<u>VALUE (\$M)</u>	<u>DESCRIPTION</u>
FMS	Iran	\$250	I-Hawk Depot

This proposed sale will provide Iran with a variety of equipment needed to establish a facility capable of depot level overhaul of major items in the I-Hawk, Rapier and Oerlikon weapons systems (the latter two systems acquired from European sources). The facility will also provide somewhat lesser capabilities for repair and maintenance of certain component assemblies for these weapons systems. Equipment to be provided consists of electronic test equipment and industrial equipment such as lathes, welding machines, presses, etc. Of the total value of this case, \$220 million will be counted against the conventional arms ceiling.

Decision: Approve ✓ Disapprove J

<u>TYPE CASE</u>	<u>COUNTRY</u>	<u>VALUE (\$M)</u>	<u>DESCRIPTION</u>
FMS	Thailand	\$14.8	4 F-5E aircraft

Thailand has asked for earliest possible delivery of 4 F-5E aircraft to add to its present fleet of 20 F-5E/Fs. Thailand is particularly anxious to improve its air defenses in the face of the numerical air superiority enjoyed by its communist neighbors. Acquisition of these aircraft may permit Thailand to delay purchase of the additional squadron of F-5Es which the Vice President told Thai leaders during his recent visit we were prepared to sell.

Decision: Approve ✓ Disapprove J

<u>TYPE CASE</u>	<u>COUNTRY</u>	<u>VALUE (\$M)</u>	<u>DESCRIPTION</u>
FMS	Austria	\$39.8	50 M60A3 Tanks

These tanks would replace obsolete M47 tanks, releasing the latter for use by reserve forces. The sale would be consistent with our policy to assist and encourage Austria in modernizing its Armed Forces and would improve Austria's ability to prevent incursions into or through its strategically located territories.

Decision: Approve ✓ Disapprove J

~~CONFIDENTIAL~~

The proposed I-Hawk depot for Iran involves establishing a major overhaul facility, which, under PD-13, is "subject to guidelines applied globally, analyzing closely whether the proposed coproduction project would over time provide equipment in excess of local needs."

Iranian interest in a depot to overhaul Hawk missiles began with the inception of the Hawk program in 1972. The concept was the subject of two major studies, the latest of which was in 1977. This study offered three alternatives: (1) a limited refurbishing capability with most items to be returned to the U.S. for overhaul; (2) a complete depot system for Hawk and other systems; and (3) use of U.S. facilities exclusively. Iran chose option 2.

The proposed depot would permit Iran to overhaul 6 I-Hawk batteries per year which is not excessive since we have sold 37 I-Hawk batteries to Iran. It would not provide a manufacturing capability, but rather a maintenance facility which will reduce the need for continuing U.S. support of Iran's I-Hawk program.

The depot would handle all ground support equipment, generators and air conditioners and include a capability to support the Rapier and Oerlikon (supplied from Europe) which have items in common with I-Hawk.

Factors in favor of the proposal:

-- It is militarily justified. The depot would increase Iranian self-sufficiency and reduce logistic pipeline time.

-- No additional U.S. technology will have to be transferred.

-- Iranian requirements are sufficiently large to make a depot economically feasible. The capacity will not be in excess of local needs.

-- It will eventually reduce the need for U.S. personnel in Iran.

Factors against the proposal:

-- The depot would reduce the leverage the U.S. could exercise over Iran.

-- U.S. employment and income would be reduced over the long run. These losses would be offset in the short run as a result of initial sales of training, technical assistance and capital goods for the depot.

-- It will strain Iran's limited pool of skilled manpower.

~~CONFIDENTIAL~~

Conclusion:

That establishing the I-Hawk depot would not lead to excess capacity and would serve U.S. interests.

RECOMMENDED TELEPHONE CALL

TO: Chancellor Helmut Schmidt

DATE: Friday, August 18, 2:00 p.m.

RECOMMENDED BY: Zbigniew Brzezinski *Zb.*

PURPOSE: To discuss follow-up to your German visit and other issues.

BACKGROUND: You asked that a call be set up in a notation on July 21 memorandum from Henry Owen (see attached).

TOPICS OF DISCUSSION:

1. Schmidt will know of the happy outcome to the Croatian take-over of the German consulate in Chicago. Our cooperation with the Germans in handling the situation was extremely close.
2. You might raise how to follow up on the good relations established between you and the Chancellor in your bilateral visit. One possibility would be to have members of your personal staff visit Schmidt from time to time to give him a first-hand report of your thinking on matters of mutual interest, and to give you a first-hand report of the Chancellor's reactions. If this notion appeals to the Chancellor, Zbig could go to Bonn in September to brief him on Middle East and SALT developments. Henry Owen and Charlie Schultze could come then or later to brief him about U.S. planning regarding foreign and domestic economic issues. You might suggest that with Schmidt's approval, you announce the arrangements.

Harold or
Zbig visit re
C David - defense -
SALT, etc

DECLASSIFIED

Per, Rac Project

ESDN: NLC-126-14-6-2-8

by *KS* NARA DATE *6/10/13*

3. You may want to repeat the congratulations in your letter about Schmidt's 1% stimulus action.
4. You might reinforce the points in your letter to Schmidt on the Camp David meetings.
5. You might want to spell out the reasons for your veto of the defense authorization bill.
6. Schmidt may raise the issue of cooperation in tanks, and the letter on the subject Callaghan sent to both of you. You should stress your personal attention to cooperation on the German tank gun, along with our desire to study ways to cooperate more broadly.

BY KS NARA DATE 6/10/13

MEMORANDUM FOR: THE PRESIDENT

FROM: HENRY OWEN *HO*

SUBJECT: Follow-Up and Your Bilateral
Visit to Germany

1. It might be useful to follow up on your bilateral visit to Germany with action to confirm and symbolize the good relations now established between you and the Chancellor.
2. One idea that occurred to me in Bonn: To have Zbig visit Bonn from time to time to give Schmidt a first-hand view of your thinking on foreign policy, and to give you a first-hand report of the Chancellor's views. On occasion, Charlie Schultze and I could accompany him to discuss economic issues.
3. If this notion appeals to you, you might raise it in the next phone talk with the Chancellor.

- ① I concur. E.g. I could brief Schmidt in early Sept. on the dis. Inf. issue or on SALT, or on both.
- ② I recommend you give Schmidt a call to keep in touch, to tell him of your reaction to the summit, and to suggest the above.
- ③ Do you want a call set-up?

MEMORANDUM FOR THE PRESIDENT

FROM:

TIM KRAFT TK
JIM GAMMILL Jimb

SUBJECT:

Delegation to the United Nations
General Assembly

The 33rd Session of the United Nations General Assembly is scheduled for September 19 through December 22. The United States will have five representatives and five alternate representatives. Of these ten, five will be the Ambassadors permanently at the United Nations; the remaining five will be two members of the Senate and three public members appointed by the President with Senate confirmation.

John W. Hechinger (Washington, D.C.): President of the Hechinger Company. District-wide Committeeman for the DNC. Was the first Chairman of the District of Columbia City Council. Recommended by Ambassador Andrew Young.

Set C. Momjian (Philadelphia, Pennsylvania): Community leader, philanthropist, art patron, humanitarian and active Democrat.

Angelique O. Stahl (Fort Lauderdale, Florida): Chairman of the Board of Broward Federal Savings and Loan Association. She has been involved in numerous civic, political and social activities. Recommended strongly by Senators Stone and Chiles.

We feel that these three people will represent the United States well at the United Nations.

-2-

RECOMMENDATION:

Nominate the three following people as public
representatives to the United Nations General
Assembly.

JOHN W. HECHINGER, fourth-generation Washingtonian, graduate of the city's public schools and Yale University, served in the Air Force throughout World War II, overseas in the China-Burma-India and Pacific Theatres. He joined the Hechinger Company in 1946, becoming President upon the death of his father, the founder, in 1958.

Hechinger is the Democratic National Committeeman, re-elected city-wide in 1976 to his second four-year term. He is a trustee of the American University and of the Meyer Foundation, a Commissioner of the D. C. Judicial Nomination Commission, co-chairman of the Citizens' Advisory Committee to the D. C. Bar Association, a member of the Board of the National Urban Coalition, a member of the Yale University Development Fund, and vice president of the Committee for Self-Determination.

Mr. Hechinger served as first Chairman of the D. C. City Council from 1967 to 1969. He has served as President of Columbia Hospital, Commissioner of RLA, trustee of the Public Library, vice president of the Health & Welfare Council, member of the Public Welfare Advisory Committee, on the Board of the Washington Urban League, the Boys' Club of Washington, the D. C. Bicentennial Commission, and the D. C. City Council Economic and Industrial Commission.

He is married to June Ross Hechinger and they have four children.

PERSONAL

Graduate of the Charles Morris Price School of Advertising and Journalism. The Charles Morris Price School is a 58 year old private institution used as a graduate school for Journalism. Graduate work at Penn State University and The Philadelphia Museum of Art. Have had considerable experience with a number of the major corporations of this country as an International Marketing and Sales Executive, as well as in public service activities. Am presently serving on the Boards of many philanthropic organizations which spend millions of dollars on cultural, social and philanthropic causes throughout the world. I wish to serve the present Administration in some position which would take advantage of my extensive training and diverse experience.

Born on 9 April 1930 in Atlantic City, New Jersey. Married with two children. Excellent Health. Height 5'7"; Weight 165 lbs. Social Security # 157-18-1517

PROFESSIONAL AREAS

- | | |
|------------------------------|---------------------------|
| * Administration/Management | * Public Speaking |
| * Government Liaison/Process | * International Marketing |
| * International Affairs | * Ethnic Affairs |
| * Education | * Art |

EMPLOYMENT HISTORY

From 1952 to present, I have been employed by the Ford Motor Company holding executive positions in Marketing, Sales and Advertising. Over the past 25 years, I have been involved in domestic as well as international marketing. At one time, I was responsible for all international conventions and meetings for Philco-Ford. At present, my time is spent in community affairs.

MILITARY SERVICE

Enlisted in the U. S. Army in 1948 serving on the Army Times as a reporter.

FIELDS OF SPECIAL INTEREST

Internationally Known Collector of Art

Presently items from my collection are gifted or are on loan with the following museums and institutions: New York Metropolitan Museum of Art; Philadelphia Museum of Art; Pennsylvania Academy of Fine Arts; Franklin Institute; Smithsonian; Fairmount Park; Independence Hall; Afro/American Museum; Balch Institute; Academy of Music; Capitol Building.

Afro/American History

Have one of the largest collections of Black History in the country. The collection covers the early part of the 18th Century through the Reconstruction period. Parts of the collection are housed at the Afro/American Museum in Philadelphia and the Smithsonian in Washington.

Bicentennial

In the year 1976, I raised \$600,000 in order to give America a Bicentennial gift. The gift consisted of 21 American Tapestries by Albert Herter on the History of New York City. On the evening of November 28, 1976, at a banquet at the Waldorf attended by 1500 people, the Tapestries, valued at one million dollars, were presented to the New York Metropolitan Museum of Art. The New York Times wrote three major stories regarding the gift calling it the greatest Bicentennial event of the year.

CIVIC AND COMMUNITY ACTIVITIES

Balch Institute (Board Member) - The largest museum and study center in North America devoted to ethnic studies.

Brandywine Museum & Conservatory (National Chairman of the Endowment)

The Museum is committed to preserving not only great art but also the very land and water which inspires that art. It is a commitment to a heritage that has enriched the lives of all Americans. The Brandywine Heritage flourishes in the hands of many important artists - including Andrew Wyeth and his son James.

Afro/American Historical & Cultural Museum (Board Member)

The Museum holds a special place in American history in that it is the only museum specifically built to house collections on Afro/American culture. Five different galleries trace Afro/American history from its African heritage to present day. I was the first white elected to the all black board.

Philadelphia Academy of Music (Advisory Board & Archive Committee)

Home of the famed Philadelphia Orchestra. The orchestra not only brings guest conductors from foreign lands, but also tours the world spreading good will through music.

Armenian Sisters Academy (Board Member)

A small private Montessori school located in Radnor, Pennsylvania. Open to all students regardless of ethnic background.

Franklin Institute (Advisory Board)

The Franklin Institute is a 150 year old non-profit institution in the cultural area of Philadelphia. The efforts of the Institute are based on the belief that science offers man knowledge, that technology can permit this knowledge to be employed to meet the needs and desires of people and that the application of technology should be based on a respect for human values. The Institute thus serves as a living memorial to Benjamin Franklin who shared these beliefs.

Philibosian Foundation (Board Member)

A family foundation (assets in excess of \$3,000,000), which distributes grants for social, cultural and philanthropic purposes throughout the world.

Armenian Missionary Association of America (Board Member)

International philanthropic and educational organization which operates schools, medical clinics and relief centers throughout the world.

Columbia University - Armenian Studies Advisory Council

The purpose is to advise the University on the newly created Armenian Chair; the academic program and the community oriented program which the Chair is sponsoring.

Capitol Children's Museum (Advisory Board)

Capitol Children's Museum is a "hands-on" learning laboratory which integrates art, science, humanities and technology. It has oversized and unusual things, like a museum; and visitors touch, shape, explore, handle, use and test the things, like in a laboratory.

University of Pennsylvania (Advisory Board)

National Democratic Party Nationalities Council (Vice-Chairman)

Committee of Americans for Panamal Canal Treaty (Member)

Citizens for Tax Reform (Member)

Member of many other academic, cultural and service organizations. Over the years have given many public lectures, appeared on television panel discussions and acted as host for international visitors, including a brief visit with Queen Elizabeth II on July 6th in Philadelphia.

WASHINGTON

August 17, 1978

C

MEMORANDUM FOR THE PRESIDENT

FROM:

TIM KRAFT TK
JIM GAMMILL Jim G

SUBJECT:

Small Business Conference Commission

In May you signed an Executive Order providing for a White House Conference on Small Business to be held in the fall of 1979. The Executive Order also provides for the appointment of a five-member commission and the designation of a Chairman.

Vernon Weaver has submitted a list of recommendations which has our full support. There are three men and two women, including one Black woman.

Chairman:

Arthur Levitt, Jr. is Chairman of the Board of Governors and Chief Executive Officer of the American Stock Exchange. He is formerly President and a Director of Shearson Hayden Stone, Inc., a New York-based securities and investment banking firm. He has testified before the Ways and Means Committee on behalf of smaller and independent business. He has been recommended by Senator Gaylord Nelson.

Members:

Steven E. Weinstein of Atlanta is Chief Executive Officer of Second Realty Co., the Cleveland Corporation and Real Estate Operations, Inc. For several months, he was a confidential advisor to Vernon Weaver at the Small Business Administration, and is Weaver's special choice for the Commission.

-2-

Ann M. Davis of California is Director of Community Relations and Public Affairs at a local radio station. She is a member of the Board of Directors for All Pro Broadcasting, Wana Trucking Co. and Willie Davis Distributing Co. She has been recommended by Chuck Manatt and Evan Dobelle.

Margaret Sutherland Hansson of Boulder, Colorado is the founder and Chief Executive Officer of Genac, Inc. a manufacturer of products for handicapped children and adults. She serves on the Boards of several small businesses and is active in community affairs. She has been recommended by Senator Floyd Haskell.

Shepard Lee of Auburn, Maine is an automobile, motorcycle and recreational vehicle dealer. He has served as the Maine State Chairman of the SBA Advisory Council and as a member of the National Advisory Council on Small Business. He is highly recommended by Senators Hathaway and Muskie and Ken Curtis.

RECOMMENDATION:

Approve the list as recommended by Vernon Weaver for appointment to the Small Business Conference Commission.

 ☒ approve disapprove

Designate Arthur Levitt, Jr. as Chairman of the Small Business Conference Commission.

 ☒ approve disapprove

J

R
E

E
S

ARTHUR LEVITT, JR.

Arthur Levitt, Jr. will serve as Chairman of the Board of Governors and Chief Executive Officer of the American Stock Exchange for a five-year term from 1978 to 1982. Prior to his election to that position, he was President and a Director since 1969 of Shearson Hayden Stone Inc. and a partner of a predecessor firm since 1962. The product of the consolidation of several companies, Shearson is a New York-based securities and investment banking concern with an extensive network of domestic and international branch offices.

A Magna Cum Laude graduate of Williams College and member of Phi Beta Kappa, Mr. Levitt began his business career in 1954 with Time Inc. where he became Assistant Promotion Director. From 1959 to 1964, he was associated with Oppenheimer Industries, an agricultural investment firm, as an Executive Vice President and Director. He served with the U.S. Air Force from 1952 to 1954 and retired from the active Reserves as a Major in 1976. He is a former Liaison Officer for the U.S. Air Force Academy.

Mr. Levitt's outside affiliations reflect the diversity of his interests, ranging from industry and business related associations to politics, community affairs, conservationist endeavors, and the arts.

A frequent spokesman for the securities industry, he was elected a Governor of the American Stock Exchange in 1975 and is a member of the Governing Council of the Securities Industry Association. He serves as a Director of the East New York Savings Bank and the ~~Depository Trust Company~~. Active in politics and community affairs, Mr. Levitt was a delegate to the 1967 New York State Constitutional Convention and served as Educational Consultant to the Mayor of New York City from 1961 to 1963. He is a former Trustee of the Community Service Society and Brooklyn Hospital and is currently Chairman of the Board of the Poly Prep Country Day School, of which he is an alumnus.

An ardent conservationist and supporter of the arts, Mr. Levitt wrote and sponsored the Conservation Bill of Rights presently incorporated in the New York State Constitution and was Chairman of the Conservation Committee at the 1967 Constitutional Convention. He was appointed to the New York State Council on the Arts in 1970 and 1973 and is a Trustee and former President of the MacDowell Colony.

Mr. Levitt is also a member of the Sierra Club, the Adirondack Mountain Club, India House, The Bond Club of New York, The Economic Club of New York, the City Athletic Club, and the Century Country Club.

Born in Brooklyn, New York in 1931, Mr. Levitt has been married since 1955 to the former Marilyn Blauner. Their two children, Arthur III and Lauri, are college students. The family has an apartment in Manhattan and a home in Westport, Connecticut.

Committee 1974 - 1976, Chairman Governance
Committee 1977 to present.

PATENTS

Patents in children's products field. Gerry Back
Carriers, three. Gerry Kiddie Carrier, 'Maginarys
and various small product patents.

Published - with G.A. Cunningham, Lightweight Camping
Equipment and How to Make It, Charles Scribner's
Sons, revised edition 1975.
Magazine articles etc. in trade and general press.

June 30, 1978

RESUME

Shepard Lee
809 Center Street
Auburn, Maine 04210

Born November 13, 1926 at Lewiston, Maine.

Educated at Lewiston Schools, Lewiston High School, Bowdoin College, Brunswick, Maine. Was elected Phi Beta Kappa while a junior at Bowdoin College and was graduated magna cum laude with high honors in government, class of 1947.

Joined the staff of Advance Auto Sales in 1947 upon graduation from college. Advance Auto was a small Desoto-Plymouth dealership in downtown auburn owned by his father and a business partner. Started as a salesman and became General Manager in the early 1950's. The dealership became a Chrysler-Plymouth dealership upon the demise of the Desoto automobile and in 1963 Lee bought out the partner's interest.

In 1966 Lee established Advance Acceptance Company, an automotive finance company, and in 1971 added the Subaru to the Chrysler-Plymouth line at Advance Auto. In 1972 Lee started Giant Advance Camper Country, a recreation vehicle dealership, which handles a wide variety of recreation vehicles, including tent trailers to motor homes.

In 1974 Lee purchased the Cadillac-Oldsmobile dealership in Lewiston and in 1977, as a result of having increased Cadillac sales by 400% and Oldsmobile by about 150%, Lee constructed a new larger dealership in Auburn, Maine and added the Honda Franchise to the dealership. In 1976 Lee opened a Datsun dealership and transferred BMW to the Datsun dealership, which is located 3 miles down the road from the new Cadillac-Oldsmobile-Honda dealership in the city of Auburn.

Lee has been an active civic participant all of his life and has had special interest in the small business world. He served as Maine State Chairman of the Small Business Administration Advisory Council in the late 60's, and then became a member of the National Advisory Council for the Small Business Administration. Lee helped establish one of the first successful SCORE programs in the country and has been active, as well, in The Partners of The Americas Program. Has served as chairman of the NAACP Housing Committee, as a member of Governor Curtis' task force on reorganizing Maine State Government, as a member of the Bowdoin College Alumni Council, the Poland Spring Job Corp Advisory Council and a variety of other civic functions, such as United Fund Board, Rotary Board, President of the Androscoggin Mental Health Association etc.

Lee is currently serving as a member of the National Board of The American Civil Liberties Union and played an active role as chairman of one of their special commissions. Lee is a member of the Board of Directors of the Casco Bank and Trust Company, and a former member of the Auburn School Committee.

Lee has served in a variety of capacities for the Democratic Party and individual candidates, and has been chairman of the Democratic Finance Committee for Maine, cochairman of the Muskie for Senate Committee, and Muskie for President Committee for Maine, and has played an active role in Democratic campaigns since the early 1950's.

WASHINGTON

August 18, 1978

MEMORANDUM TO

MEMBERS OF THE CABINET

The next several weeks will be critical to the success of our Administration. The Energy Bill, Civil Service Reform, and votes to override my veto of the Defense Authorization Bill will all take place.

Your help on Civil Service Reform has put us in a good position in both houses of the Congress. I need your continued assistance and support on each of the critical issues in the weeks ahead. Please give Frank Moore and his staff your complete and enthusiastic help and cooperation.

Jimmy Carter

MEETING WITH CONGRESSIONAL CANDIDATE, BOB SAMUELSON (2-S.D.)

Friday, August 18, 1978

9:43 a.m. (2 minutes)

The Oval Office

FROM: FRANK MOORE

f.m./pd

I) PURPOSE

A photo with the President

II) BACKGROUND, PARTICIPANTS AND PRESS PLAN

A. Background: Bob Samuelson is the Democratic candidate for Congress in the Second District of South Dakota. He is challenging Republican incumbent James Abdnor. Samuelson is, at this time, not given a good chance of defeating Abdnor who received 70% of the vote in 1976.

Samuelson is a self made rancher currently owning some 5,000 head of cattle. He is a relative newcomer to politics with his only previous experience an unsuccessful run for the state senate. He was one of the leaders of the "Beef-In" in Washington in 1974. He has continued that theme of a producer/consumer partnership as being desirable in his Congressional campaign. Recent polls show Abdnor as very strong. His only weak point was seen as Indian relations. Samuelson is attempting to take advantage of this. The House Campaign Committee reports that, despite the fact that he is a long shot, Congressman Corman is very high on him.

B. Participants: The President and Bob Samuelson

C. Press Plan: White House Photographer

III) TALKING POINTS

A. Usual courtesies
